

Brooder Heating Systems

Super Glo Infrared Brooder

(Shown Above)

When Hired-Hand introduced the Super Glo Brooder, we were launching the new standard in radiant heat brooders for the agricultural market. Over the years, this fact has proven true. The Super Glo provides consistent first time ignition with minimal warm up time. This heavy duty cast iron burner is the most reliable open port burner in the industry, with a 10 year limited warranty.

Features:

- simple to clean pilot or hot surface ignition
- 42,000 btus
- consistency in performance and reliability
- cast burner ensures efficient and consistent performance
- ease of assembly, installation and maintenance
- improved temperature distribution at bird level
- individual or zone control
- 37" aluminized canopy
- hot surface ignition unit available in 120v or 24v versions

* 30' diameter heating pattern when suspended 5' from floor

Bansen Jet Brooder

The Bansen Jet Brooder became the first, high efficiency, electronically ignited brooder for the agricultural market when it was released by Hired-Hand and has since become the proven high efficiency leader for the industry. The preferred bansen-style mixing chamber dramatically increases efficiency.

This easy to assemble, low maintenance brooder is just another example of Hired-Hand's commitment to the agricultural heating market to constantly strive to introduce innovative, efficient equipment at affordable prices.

Features:

- unique suspension design makes for easy assembly
- totally enclosed pre-assembled electronic components
- zone control compatible
- pre-bent rigid gas tubing
- available in 32,000 and 42,000 btus
- 120/240 vac, 50/60 Hz
- 34" canopy available in galvanized or aluminum
- 48" canopy available aluminized
